DECLASSIFIED BY ORIGINATING AGENCY

### DETAILED ACTION

1. Claim 1 is objected to because of the following informalities:

In line 2 of claim 1, "a" should be "an."

In lines 4, 6, and 8 of claim 1, the deflector door is referred to as a deflector door, a deflector, and as a door. It appears that all of these terms refer to one element, and the use of a single term (i.e. "deflector door") for this element throughout the claims is preferred. Appropriate correction is required.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In lines 7-8 of claim 1, the sidewalls are described as "movable in the plane of the door," which does not appear to agree with the drawings in the instant specification: rather than being movable in the plane of the door, the disclosed sidewalls appear to be *translatable along a plane which is parallel to the surface of the deflector door*.

In lines 2-3 of claim 6, the phrase "tray type structure" is indefinite because the scope of what comprises a tray *type* structure is not clear.

In lines 5-6 of claim 9, the phrase "parallelogram type linkage" is indefinite because the scope of what comprises a parallelogram *type* linkage is not clear.

In lines 3-4 of claim 11, there is no antecedent basis for "the main region of the door."

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Insofar as can be determined in light of their indefiniteness, claims 1-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by MacLean et al (U.S. patent 4,978,071). In figure 2, MacLean discloses an airframe/nozzle arrangement comprising:  
a hinged deflector door mounted on the underside of an airframe formed by elements 26B, 96b, 96a, 32b, 60BL, 60BR;  
right and left sidewall deflectors 70BR and 70BL; wherein  
the sidewalls are movable in the plane of the door (via hinges 60);  
the motion of the sidewalls is coordinated to provide left or right yaw; and  
the downstream edge of the deflector door is angled with respect to the main region of the door (see bottom right flap portion in figure 3).

5. Claims 6-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Enderle et al, Meyer, Thayer, Oppen, Jr. et al, and to Holden are cited to show thrust deflectors which induce yaw. The patents to Neumayr, Moller, Sadleir, Bacchi et al, and to Bradbury are cited to show VSTOL/VTOL aircraft with thrust vectoring. The patents to Smale and to Fischer are cited to show vane links.
